Kevin Tao (Wentao Xiong)

AI Full Stack Engineer

+86 15727546130 (WeChat) • taokevin1024@gmail.com • Linktree: @kevintao1024

Online Resume: me.kevintao1024.com • Blog: kevintao1024.com

DOB: Sep 12, 1996 • 6 Years of Professional Experience • B.Sc. Computer Science, Jiujiang University

Professional Skills

CS Fundamentals: Data Structures & Algorithms, HTTP/HTTPS, TCP/IP, JSON, Protobuf, Windows, macOS, Linux

Languages: Golang, Python, Node.js, Java, C, C++, Lua, SQL, Shell, HTML, CSS, JavaScript, TypeScript

AI Stack: LLM Agent, AIGC, OpenClaw, Claude, ChatGPT, DeepSeek, Mem0, ElevenLabs, Chroma, LangChain

Frontend: WeChat Mini Program, React, Next.js, Cocos Creator, Love2D, npm, ES6, Ghost

Backend: Kratos, FastAPI, Spring, RESTful API, gRPC, Kafka, JWT, MySQL, Redis, PostgreSQL, MongoDB, SQLite, ELK, ClickHouse, Git, DevOps, CI/CD, Nginx, Docker, Kubernetes, AWS, Alibaba Cloud

Work Experience

U.S. Tech Company (Remote) | Shenzhen, Guangdong | Aug 2024 – Dec 2025

AI Full Stack Engineer (Backend-focused)

- Designed and developed AI Agent services, wrapping LLM capabilities (OpenAI, Claude, DeepSeek) into standardized API services.
- Independently led end-to-end module design and development, ensuring stable releases and iterative delivery.
- Led a 3-person team to deliver browser-use-based AI automation within one month; established Code Review standards and documentation practices.

Independent Developer | Shenzhen, Guangdong | Nov 2022 – Jul 2024

AI Full Stack Engineer

- Contracted at Shenzhen Qihang Interactive Entertainment (Sep 2023 – Mar 2024), contributing to server-side backend refactoring.
- Independently designed and built UniGPT (AI aggregation platform) and VirtuaLifes (AI Agent platform).
- Deep contributor to RealChar (6.2K ★) and AI-Town (9.6K ★); proficient in AI application server architecture and deployment.

Shenzhen Tongquan Technology Co., Ltd. | Shenzhen, Guangdong | Mar 2022 – Oct 2022

Software Engineer

- Designed and built a Business Analytics System aggregating game log data with API query interfaces to support operations strategy.
- Core modules in Golang + Kratos; MySQL + Redis for storage; ClickHouse for analytics; CI/CD automated deployment.
- Self-initiated ELK log analysis platform with error alerting dashboards, improving troubleshooting efficiency and preventing production incidents.

Shenzhen Huoyuansu Network Technology Co., Ltd. | Shenzhen, Guangdong | Apr 2021 – Jan 2022

Software Engineer

- Joined a strategic new project (blockchain game) in a 50+ person division; responsible for auction service, blind-box service backend, and infrastructure.
- Built microservices from scratch using Golang + Kratos; MySQL + Redis; Docker + K8s containerized deployment.
- Introduced zaplog for optimized structured logging; standardized DevOps processes via automation to enhance system stability.

Jiangxi Zhongzhi Data Group Co., Ltd. | Nanchang, Jiangxi | May 2020 – Apr 2021

Software Engineer

- Developed and optimized AI bot algorithms for an overseas Mahjong game, directly impacting player experience and revenue.
- Implemented tile-draw/discard algorithms with difficulty-level mechanisms in Golang.
- Optimized the recommended-discard algorithm using sync.Map memoized search, achieving ~5x performance improvement and significantly reducing server load.

Featured Projects

useClawdbot: OpenClaw (Clawdbot) task marketplace — post or accept tasks. Skill trading and Claw hosting in development. [Live] [GitHub]

Tech stack: Node.js, Go, Docker, Kubernetes

AI Build: All-in-one AI learning & build platform: systematic methodology + battle-tested templates + versatile agents = profitable products fast. [Live]

Tech stack: Next.js, BetterAuth, Stripe, Tailwind CSS, Vercel AI SDK, ChatGPT API, Resend, Fumadocs

Mysta: AI Agent automating browser operations for Twitter, Xiaohongshu, etc. — posting, auto-reply, and more. [Live]

Tech stack: DeepSeek, Python, Node.js, TypeScript, React, PostgreSQL, Railway

Thinkverse: AI math education platform: custom question banks & metric analysis for teachers; AI tutoring & performance analytics for students. [Live]

Tech stack: OpenAI, Svelte, SvelteKit, NeonDB, Vercel

VirtuaLifes: Next-gen customizable super-agent platform. Create agents with unique memories, appearance, and voice from text/image/audio. [Live]

Tech stack: TypeScript, React, WebSockets, Python, FastAPI, SQLite, Docker

UniGPT: Enhanced all-in-one AI platform: multi-model, multi-modal, multi-language, multi-payment. [Live]

Tech stack: TypeScript, React, Next.js, Node.js, Docker

YinYuan AI Music: AI music WeChat Mini Program with playback, AI generation, and subscription top-up. [Details]

Tech stack: WeChat Mini Program, Node.js, Docker

AI Fitness Coach: AI bot for personal/enterprise WeChat & official accounts. Handles text, voice, images; OS/internet access; extensible plugins. [Details] [GitHub]

Tech stack: Python, itchat, GPT, Stable Diffusion

RealChar ★6.2K: AI companion app to create, customize & chat with characters in real time on Web, Mobile, Terminal. [Live] [GitHub]

Tech stack: GPT, ElevenLabs, Chroma, LangChain, STT, TTS

AI-Town ★9.6K: A virtual town where AI characters live, chat and socialize via Generative Agents simulating human behavior. [Live] [GitHub]

Tech stack: TypeScript, OpenAI, Convex, Clerk, Pinecone, Fly

Fucking-Algorithm ★118K: Complete algorithm toolkit: website, two PDFs (Algorithm Secrets & LeetCode Notes), plugins for Chrome/VSCode/JetBrains. [Website] [GitHub]

Find Your Best Music Match: Music social WeChat Mini Program — won 3rd Prize (Central China) at China College Computer Contest WeChat Mini Program Competition. [GitHub]

Tech stack: Java, Python, MySQL, Redis, Mahout, WeChat Mini Program
